

RUMEN YEAST CAPS

Helps Maximise Rumen Health

A source of probiotics for dairy and beef cattle

When cows are off feed, helping them to return to normal intake levels and profitability quickly is the top priority. Rumen Yeast Caps help improve digestive restoration and encourage increased intake by providing a concentrated form of niacin and a quick boost of yeast. The use of Rumen Yeast Caps can help to restore beneficial bacteria in the rumen and encourage dry matter intake any time that normal digestive health has been interrupted. Nutritionists and veterinarians recommend niacin supplementation as an essential nutrient for cows suffering from ketosis.

FEATURES AND BENEFITS

- Contains concentrated strains of live yeast cells
- Includes recommended levels of niacin (essential for cows suffering from ketosis)
- Easy-to-administer capsule that contains healthy bacteria and concentrated form of niacin to help speed a return to healthy digestion

WHEN TO USE

- For dairy cows in the transition period
- To encourage dry matter intake
- To help restore healthy bacterial balance to the rumen
- To help improve feed efficiency
- After antibiotic treatment

PACK SIZES

- 25 capsules/jar
- 300 capsules/box

USAGE INSTRUCTIONS

Dairy Cows:

- Give one capsule daily for 2-3 days in succession both pre and post calving or whenever feed or dry matter intake drops below normal as a result of stress or environmental changes.

Beef Cattle and Young Stock:

- Give one capsule daily for 2-3 days in succession after arrival in the feedlot or whenever feed or dry matter intake drops below normal as a result of stress or environmental changes.
